

Instructions for use of the car charger type 2USC3027-Q3

General informations

The device is used to charge devices adapted to this in vehicles equipped with a cigarette lighter socket (12V or 24V). The product has overvoltage and overheating protection as well as overcurrent protection. The charger is CE certified and complies with the RoHs and EMC directives.

Safety and precautions

In order to use the product safely, you should first read the instructions and guidelines for safe use. The user is fully responsible for any damage caused by failure to follow the instructions and conditions of use. Any other use may damage the products or be life-threatening.

- The products are not intended for use by children.
- Products should be protected against moisture, flammable and hazardous substances, solvents, strong vibrations, mechanical loads, contact with liquids, dust and any materials that may affect the structure of the housing.
- Products that are partially defective or damaged must not be used. In case of malfunctions, contact the manufacturer.
- It is recommended that no device is connected to the charger when plugging and unplugging it.
- Do not use the cable to charge a device that is damaged.
- Pay attention to the correct connection of the cable and the charger to the device and the power source.
- A power device must not be left unattended.
- Do not cover the charger during operation and ensure free air flow for the device.
- Unplug the charger or cord from the power outlet when not in use.
- Take special care not to short circuit the cable ends and the devices it comes into contact with.
- Any interference in changing the operation of the products is prohibited.
- Do not start the vehicle engine with the charger in the socket.
- For maintenance, a disconnected product should be cleaned with a dry cloth.

Use of the device

- Make sure that the parameters of the device are compatible with the installation in the vehicle.
- Check that no devices are connected to the socket.
- Place the charger in the 12V cigarette lighter socket.
- Connect the device / devices to the charger.
- The charger will automatically detect the charging standard and start charging

- After using the device unplug it from the socket.

Utilization

The product must not be disposed of in ordinary waste containers. The user is obliged to hand over the used equipment to a designated collection point for the recycling of waste generated from electronic components. By ensuring proper disposal, you help to protect the environment. Recycling helps conserve the planet's natural resources.

Product parameters

Supply voltage:	12V do 24V
Voltages and amperage for a port that supports Quick Charge (USB type A)	from 3.6V to 6.5V – 3A, from 6.5V to 9V – 2A, from 9V to 12V – 1.5A
Voltages and amperage for a port that supports USB type A	5V – 2.4A
Cable compliance with charging standards	Power Delivery, Quick Charge 3.0
Cable usage temperature range	from 0°C to 40°C
Relative humidity range for cord use	from 20% to 90%

Always consider the correct operation, parameters and recommendations of device and cable manufacturers and installation of the vehicle with which the products come into direct contact.
